

- Category:** Utilization Management
- Code:** UM 2.0 Attach G Inpatient MH
- Subject:** Inpatient (IP) Mental Health (MH) Level of Care Guidelines
- Purpose:** The purpose of this policy is to describe the criteria used by BHP in medical necessity determinations for inpatient MH services.
- Policy:** BHP Care Management (CM) staff use the following level of care guidelines for inpatient MH services when completing medical necessity determinations.

Please refer to the enrollee's benefit document for specific information. To the extent there is any inconsistency between this policy and the terms of the enrollee's benefit plan or certificate of coverage, the terms of the enrollee's benefit plan document will govern.

Benefits must be available for healthcare services. Healthcare services must be ordered by a physician, physician assistant, nurse practitioner, or behavioral health practitioner. Healthcare services must be medically necessary, applicable conservative treatments must have been tried, and the most cost-effective alternative must be requested for coverage consideration.

DEFINITIONS:

DSM:

The most current edition of the American Psychiatric Association Diagnostic and Statistical Manual of Mental Health Disorders.

ICD:

The most current edition of the International Statistical Classification of Diseases and Related Health Problems.

Inpatient admissions to hospitals: 'Inpatient admissions to hospitals' includes admissions to all acute medical, surgical, obstetrical, psychiatric, and chemical dependency inpatient services at a licensed hospital facility, as well as other licensed inpatient facilities including skilled nursing facilities, residential treatment centers, and free standing rehabilitation facilities.

BACKGROUND:

The criteria set is based on expert professional practice guidelines.

The optimal treatment setting and the patient's ability to benefit from a different level of care should be reevaluated on an ongoing basis throughout the course of treatment. The facility must be part of an accredited hospital setting.

GUIDELINES:

Medical Necessity Review for IP services is the responsibility of the Medical Director at BHP.

Medical Necessity Criteria – Must satisfy any of I-III, none of IV

I. Admission – must satisfy one of the following: A-C

A. Care is court ordered, or

B. The patient's clinical condition meets the diagnostic criteria for a DSM or ICD diagnosis that can either be more efficiently treated or treated more rapidly as an inpatient to decrease the patient's suffering; or

C. The patient has been diagnosed by a licensed mental health practitioner with a significant condition using the current DSM or ICD system and there is a documented need for 24-hour medical supervision because a less restrictive setting would not be beneficial due to, but not limited to, one of the following: 1-8

1. Actual or potential danger to self or others through actions with inability to provide for safety; or

2. Documentation of severe signs and/or symptoms despite an adequate trial of appropriate pharmacologic treatment and/or psychotherapy in an outpatient setting (such as, but not limited to, OP, day or partial treatment programs); or

3. Documentation that failure to keep appointments or take prescribed medications has led to or will lead to a serious deterioration in the patient's condition or create a reasonable risk of injury to self or others requiring a structured environment; or

4. Presence of a psychiatric disorder and severe multiple and complex psychosocial situations; or

5. Dual diagnoses of substance related disorder and severe mental health disorder precluding compliance with recommended outpatient or inpatient substance related disorder treatment; or

6. There is a documented need for 24-hour medical supervision for initiation or monitoring of psychotropic medications and their effects; or

7. Treatment with electroconvulsive therapy is ordered when an in-patient environment is indicated; or

8. Presence of an acute unstable medical condition that cannot be managed in a less intensive psychiatric level of care or imminent risk for acute medical status deterioration due to the presence and/or treatment of an active psychiatric symptom(s).

II. Continued stay - must satisfy: A, or B and either C or D

A. Care is court ordered; or

B. The patient's clinical condition continues to meet criteria for a DSM or ICD diagnosis; and
Copyright ©2019 Behavioral Healthcare Providers. All Rights Reserved.

C. The patient continues to demonstrate significant symptoms of a mental health disorder requiring 24-hour medical supervision that precludes transfer to a less intensive setting; or

D. There is substantial risk for re-emergence of acute symptoms or behaviors if the patient is discharged to a less intensive treatment setting or efforts to decrease structure result in an increase in symptoms.

III. Discharge - must satisfy: A, and any of B-H

A. The patient is not considered a significant and current danger to self or others; and

B. Objectives for acute inpatient care have been met and discharge plan is in place; or

C. The patient's condition has stabilized and can be managed in a less intensive treatment setting; or

D. The patient is unlikely to benefit from, or may deteriorate functionally, with continued stay in an inpatient psychiatric setting; or

E. The patient refuses to cooperate with treatment recommendations and does not satisfy clinical criteria for involuntary hold and/or civil commitment after a 72-hour evaluation; or

F. Care is custodial or maintenance in nature; or

G. Ongoing substance use or abuse that would preclude or decrease the effectiveness of treatment. (may merit need for substance abuse evaluation or treatment); or

H. The patient demonstrates stability consistent with a lower level of care.

Note: Discharge criteria do not apply to court ordered

IV. Exclusions - none of the following will be considered as sole indications for the inpatient setting: A-D

A. Impaired ability to meet academic, family, or employment obligations.

B. Psychometric testing or psychiatric evaluations that could be performed on an outpatient basis.

C. Absence of placement availability (such as, but not limited to, halfway house, foster home, board and care home or other less intensive treatment setting).

D. The patient is diagnosed with insufficient clinical data supporting the diagnosis.
